

Regional Operational Program for Mazowieckie Voivodeship for the years 2007-2013

Action 2.3. Information and communication technologies in SME.

The action is aimed at:

developing the information society by improving the access of SME to the information and communication technologies for SME.

The kinds of co-financed projects:

- use of the e-economy,
- use of the information technologies in the management process,
- improving the telecommunication infrastructure,
- application and use of information and communication technologies in management process of the companies.

The costs qualified to co-financing:

- cost of purchase of areas strictly connected with the project realization (up to 10% of qualified costs),
- cost of purchase of fixed assets strictly connected with the project realization such like machines, devices, instruments and apparatus, office equipment and technical infrastructure,
- cost of purchase of special means of transport under condition that the beneficiary does not belong to the transport sector and the mean of transport will be used only for the purposes connected with the project realization,
- cost of purchase of intangible assets; obtaining a patent, purchase of a license or non patented know-how including the implementation of the quality management system.

The maximum co-financing per project is up to 40 % of the qualified costs.
